

# ESET ERA Agent - Deploy through GPO

To install ESET to computers through GPO

## Step-by-step guide

1. Login to ESET ERA with your admin.username credentials
2. Click Admin
3. Click Deploy ERA Agent
4. Click Create Script in Remote Deployment (Use GPO or SCCM for Deployment)
5. Click configuration
6. Click SELECT
7. Select the company name, click OK
8. Click Create Package
9. Download and save the install\_config.ini file
10. Follow the instructions on this link to deploy ERA agent through GPO [http://help.eset.com/era\\_admin/64/en-US/index.html?fs\\_agent\\_deploy\\_gpo\\_sccm.htm](http://help.eset.com/era_admin/64/en-US/index.html?fs_agent_deploy_gpo_sccm.htm)
11. After the ERA Agent is deployed to computers, you can login to ERA Remote Administrator and can see the computers. Selecting the computers you can install ESA End Point and license the ESET.
12. How to guide for ERA Remote Administrator : [http://help.eset.com/era\\_admin/64/en-US/index.htm](http://help.eset.com/era_admin/64/en-US/index.htm)
